September 1, 2006

Sir:

In furtherance of the Amendment filed on July 14, 2006, this supplemental amendment is being filed to correct an oversight in the revisions made to claims 1 and 2. That is, these claims should read "formed as a result of solution treatment at 900 °C or more", such language being consistent with the arguments made with the July 14, 2006 amendment. Accordingly, it is requested that the amendments made below be entered.
